**Date: 25/01/2022**

Sports and physical education are essential components of education. The field of athletics as a profession offers a variety of job options. A career in this field can lead to a variety of job options, including joining the chosen sports, health clubs, sports goods manufacturers, sports marketing, commentators, sports journalism, trainers, teaching areas, coaching areas, publications and many other related opportunities in both the public and private sectors. Keeping this view in mind the Career Counselling Cell of Dudhnoi College has organized this workshop on "Sports as career" to familiarize students about the career opportunities in the field of sports. A total of 109 students of Dudhnoi College have participated in the workshop and they have gathered knowledge about different career opportunities in the field of sports.
